YASHICA Pentamatic

35mm SINGLE LENS REFLEX CAMERA

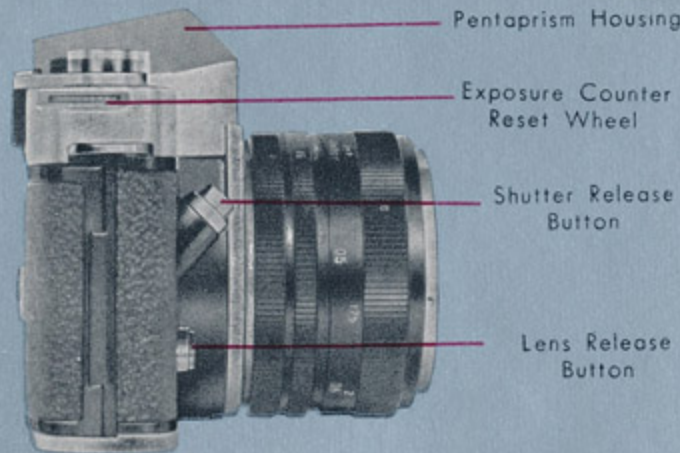

These professional features make the new YASHICA "PENTAMATIC" the best buy of the year.

A masterpiece of YASHICA engineering for anyone who has dreamed of a fine, precision-built '35' single lens reflex but who has balked at the high price.

Examine the exclusive features this new single lens reflex offers.

Compare the "PENTAMATIC" with any other S-L-R camera in the field.

You might find similar features and quality, but NEVER at this PRICE!

You will get the utmost clarity and critical sharpness with the amazing, new—AUTO YASHINON f: 1.8 5.5 cm lens—pre-set, automatic 'stop' down action.

Instant-return mirror, so smooth that you never feel it snap back and up to let the super accurate focal plane shutter do its work.

Patented, non-rotating single dial setting, precision-built focal plane shutter with 12 accurate speeds—1 to 1/1000 sec. plus Bulb and 'X'. Film rewind adopts another unique YASHICA first—pop-up rewind knob with easy fold-away crank.

Interchangeable Lenses available for the YASHICA PENTAMATIC

YASHINON Wideangle

F:2.8/100mm, pre-set, color corrected, hard-coated, bayonet mount.

YASHINON Telephoto

F:2.8/35mm, pre-set, color corrected, hard-coated, bayonet mount.

See the other outstanding features of the YASHICA "PENTAMATIC" which makes it THE BUY in the Single Lens Reflex Field.

Automatic Diaphragm

Rapid, single throw film advance lever opens the diaphragm to its widest opening; advances the film; cocks the shutter and counts the exposure—all in a split second. Snap the picture and the aperture 'stops' down to the pre-set reading.

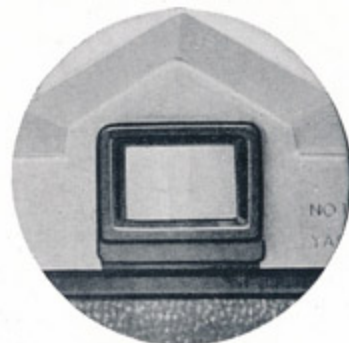

Instant Spring-back Return Mirror

Press the shutter release and the shutter diaphragm closes down, the mirror snaps back, film is exposed and the mirror returns instantly—no black out and completely automatic.

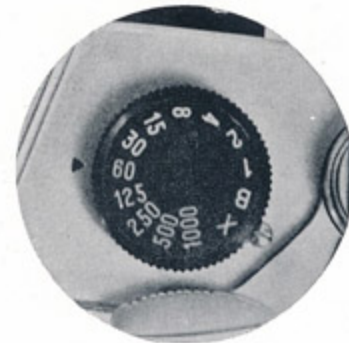

Viewing System

Condensing and fresnel lens system provides ultra-bright fine grained images—no difficult split images to confuse you. Even with your glasses on—all corners are clearly visible.

Single Non-Spinning Speed Dial

All speeds from 1 sec. to 1/1000 sec. "B" and "X" on one dial—locks in place, cannot be jarred or accidentally changed by a touch of your finger.

Easy-to-reach Diagonally Placed Shutter Release Button

Assures you of steadier holding and of easier operation of shutter release.
