BECAUSE,

THE CAMERA YOU DREAMED OF

**YASHICA
FLEX**

YOU NEVER LOSE FILM

SEE!

Focus....always O.K. Twist a knob, and there on the ground glass is the picture you are taking. No more cut-off heads or tilted out of focus.

Exposure...always O.K. Most sensitive and durable photo-electric exposure meter built in the camera teaches you an ideal exposure at any condition.

Lens.....F. 3.5, 80mm. Heliotar. Color corrected and razor sharp.

Shutter.. Completely accurate. B. 1/2, 1/5, 1/10, 1/25, 1/50, 1/100, 1/300.

Body.....Aluminum diecast, Side focus extremely smooth. With automatic film winding mechanism.

Film size. 2 1/4 x 2 1/4. 12 exposures. 120 film used.

MORE EIGHT FEATURES.

1

New system of back lock assures easiness to load film and safety while in use.

2

Over-sized magnifier in wide, light-shielding canopy.

3

Direct-vision sports finder for taken action shots at eye level.

4

Internally synchronized shutter for all types of flash. Standard ASA connector.

5

Depth of field scale shows exact range of sharp focus for each lens setting.

6

Film reminder helps you remember kind of film loaded in camera.

7

Crystal clear close-up as near as 3 Ft., parallax compensated, no cut offs.

8

Built-in Self-timer gives you a chance of snapping yourself with your.....
