TWIN-LENS REFLEX

YASHICA MAT-124

Permits Use of 120 and 220 Type Films

Designed to accept standard 120 film or 24-exposure 220 film, the Yashica Mat-124 features a sensitive, built-in match-needle CdS exposure meter cross-coupled to aperture and shutter controls, visible always from shooting posture. Extra-fast $f/2.8$ viewing lens permits critical focusing in adverse light. Reliable single stroke crank-action film transport with exposure load reminder window, automatic exposure counter for both film types, rugged platform focusing and all standard features of top-of-

the-line professional quality models make it the greatest and most versatile instrument for color and black-and-white.

■ Ingeniously designed film pressure plate for both film types ■ Yashinon 80mm 4-element lenses; $f/3.5$ taking, $f/2.8$ viewing ■ Shutter speeds from 1 to $1/500$ sec. plus Bulb; self-timer ■ M-X sync. ■ Shutter/aperture coupled match-needle CdS meter powered by a mercury battery; meter switch coupled to focusing hood

YASHICA 635

Dual Format Twin-Lens Reflex for 120 Size and 35mm Films

For exceptional versatility and economy, dual format Yashica-635 permits use of 35 mm color or black-and-white film, in addition to the regular 12-exposure 120 film. The 35 mm Conversion Kit supplied as standard accessory accepts cassettes of either 20 or 36 exposure load. Its 80 mm lens assures an effect equivalent to a multi-purpose medium telephoto in 35 mm photography, ideal for portraiture. Fresnel lens viewing screen is marked for composition on 35 mm format. The Yashica-635 features semi-auto-

matic film wind for both formats and built-in film rewind for 35 mm film.

- Matched Yashikor 80 mm f/3.5 lenses
- Shutter speeds from 1 to 1/500 sec. plus Bulb; self-timer
- Automatic counter
- Semi-automatic film transport in both formats
- Thumb wheel controls with settings visible from above
- Fresnel lens focusing screen with pop-up magnifier
- M-X sync.
- Compartment case includes 35 mm Conversion Kit

YASHICA MAT

Offers Features
Found in the Most Costly Reflex Cameras

Standard equipment for many newspaper photographers and other professionals, Yashica-MAT is the outstanding automatic twin-lens reflex in the field today. Rigid and dependable, it will give years of service with superb results. Smooth crank-action film transport also charges the shutter and prevents double exposures. Rugged, positive-action platform focusing, extra-fast $f/3.2$ viewing lens and fresnel viewing screen with center focusing spot assure rapid, precise focusing and composition.

■ Yashinon 80mm coated, color corrected lenses; $f/3.5$ taking, $f/3.2$ viewing ■ Shutter speeds from 1 to $1/500$ sec. and Bulb, self-timer ■ M-X sync. ■ Fresnel focusing screen with pop-up magnifier and touch-to-open hood ■ Thumb wheel controls with settings visible from above ■ Fully automatic crank-action film transport sets shutter and prevents double exposures, counts exposure automatically

YASHICA

D Value Leader in the Twin-Lens Reflex Field

Yashica-D incorporates the same reliable quality and rugged constructions as more expensive twin-lens reflex models, yet fits the budget of nearly everyone. This useful popular type offers semi-automatic film advance, thumb wheel shutter and aperture controls and reliable platform focusing. With greater range of shutter speeds, it offers the perfect "step-up" for those interested in developing their photographic ability.

- Yashikor 80mm f/3.5 lenses
- Shutter speeds from 1 to 1/500 sec. and Bulb; self-timer
- M-X synchronization
- Semi-automatic film transport
- Automatic exposure counter
- Thumb wheel controls visible from above
- Fresnel lens focusing screen with pop-up magnifier and touch-to-open hood
