Introduction :

The optical industry of Japan is world famous and has surpassed world standards in the camera industry. The Yashima Kogaku Seiki Co., Ltd., has a long and varied experience in this field and as a manufacturer of twin lens reflex cameras, our company has gained a leading position among others. This is possible due to our original production system, producing a superb quality and moderate priced Yashicaflex Camera. Today, the Yashicaflex camera Model A-II is recognized as a great achievement within the camera industry because of its simplicity of operation, enabling beginners to take beautiful pictures with a minimum of instruction.

When you buy the Yashicaflex Camera, you are buying "highest quality at the lowest price."
